PHR-12350  12V 95.0 AH @ 20-hr.
370 W/Cell @ 15-min.
Rechargeable Sealed Lead Acid Battery
PHR – High-Rate Series

TERMINALS: (mm)

T6: Threaded insert with 3mm stud fastener
16mm
M6
3mm
Torque: 3.9~5.5 Nxm

DIMENSIONS: inch (mm)

L: 12.00 (305)
W: 6.61 (168)
H: 8.15 (207)
HT: 8.27 (210)
Tolerances are +/- 0.04 in. (+/- 1mm) and +/- 0.08 in. (+/- 2mm) for height dimensions. All data subject to change without notice.

FEATURES

• Superb high-rate discharge characteristics that ensure reliable performance in UPS applications for up to 10 years
• Specifically designed for UPS and critical power backup applications
• Valve regulated, maintenance free spill proof construction
• Precision plate pasting for higher consistency with 100% load testing to ensure uniform capacity
• Patented dual-paste process for enhanced active material bonding and computer guided volumetric electrolyte control for precision filling
• Rugged vibration and impact resistant ABS case and cover flame retardant to UL94-V0

APPROVALS

• U.L recognized
• ISO9001:2015 – Quality management systems

PHR-12350 12V 95.0 AH @ 20-hr. 370 W/Cell @15-min.

CHARGING

Cycle Applications: Apply constant voltage charge at 2.35v/c - 2.45v/c (14.1 – 14.7v for 12v Monobloc) at 20°C. Initial charging current should be set at less than 0.25C Amps. Switch to float charge to avoid overcharging.

“Float” or “Stand-By” Service: Apply constant voltage charge of 2.25v/c – 2.30v/c (13.5 to 13.8 volts for 12v Monobloc at 20°C. When held at this voltage, the battery will seek its own current level and maintain itself in a fully charged condition.

Temperature Compensation: Charging Voltage for both Cyclic and Standby applications should be regulated in relation to ambient temperature. As temperature rises charging voltage should be reduced to prevent overcharge and increased as temperature falls to avoid undercharge.

For further charging information including temperature compensation factors, see Power Sonic Technical Manual/ Power Sonic Charger specifications.

APPLICATIONS

• High Rate UPS
• Data Centers

To ensure safe and efficient operation always refer to the latest edition of our Technical Manual, as published on our website.

CHARGERS

Power Sonic offers a wide range of chargers suitable for batteries with a variety of capacities.
Please refer to our website for more information on our switch mode and transformer type chargers.
Please contact our technical department for advice if you have difficulty in locating a suitable charger.

FURTHER INFORMATION

Please refer to our website www.power-sonic.com for a complete range of useful downloads, such as product catalogs, material safety data sheets (MSDS), ISO certification, etc.
