**Lithium Iron Phosphate (LiFePO4) Battery Hyper Sport Series**

**PAL14L-AHY** 12.8V 64W/Hr CA 250A

**Lithium Iron Phosphate (LiFePO4) Battery Hyper Sport Series**

**Terminals:** (mm)

- **L1:** 5.28 (134)
- **L2:** 5.11 (130)
- **W1:** 3.46 (88)
- **W2:** 3.30 (84)
- **H:** 6.50 (165)

Tolerances are +/- 0.04 in. (+/- 1mm) and +/- 0.08 in. (+/- 2mm) for height dimensions. All data subject to change without notice.

**Dimensions:** inch (mm)

**Performance Specifications**

- **Nominal Voltage:** 12.8V
- **Watt-Hour (2.5A to 10.0 volts):** 64
- **Charging Voltage:** 14.4V (Standard) – 14.8V (Max)
- **Charging Current:** 2.5A (Standard) - 10.0A (Max)
- **Approximate Weight:** 2.65 lbs. (1.2kg)
- **Max continuous output current:** 20A
- **Max starting current (5s at 77°F (25°C):** 250A
- **Cycle life (80% DOD at 77°F (25°C):** ≥2000
- **Charge Retention (Shelf Life) (at 68°F (20°C):**
  - 1 Month: ≥95%
  - 3 Month: ≥90%
  - 6 Month: ≥80%
- **Operating Temperature Range:**
  - Charge and Discharge Storage: 14°F (-10°C) to 131°F (55°C)
  - -4°F (-20°C) to 104°F (40°C)
- **Case:** ABS
- **Upgrade to lead acid battery model:** CB10A-A2, PTX14AH-BS, CB14A-A, CB14A-A2, CB14-B2

**Hyper Sport Series**

**Go Smart**
Active intelligent monitoring. At the heart of every Hyper Sport Lithium battery is an integrated management system that monitors and reacts to multiple voltage, current, and temperature events to maximize performance, battery life and safety.

**Go Safer**
Lithium Iron Phosphate (LiFePO4) is the safest type of lithium battery and a ready to go replacement and upgrade from lead acid, AGM or gel.

**Go Faster**
- 4X lighter
- 4X faster charge time
- 4X the warranty

**Go Longer**
- 4X longer life
- 4X the warranty

Simply connect your battery and you are ready to go.

Go Hyper Sport

---

To ensure safe and efficient operation always refer to the latest edition of our Technical Manual, as published on our website. © 2019. Power-Sonic Corporation. All rights reserved. All trademarks are the property of their respective owners.
**CHARGING**

The battery can be used if the voltage is higher or equal to 12.8V, although we recommend fully charging the battery if the voltage is below 13.0V. Apply constant voltage charge between 14.0V and 15.0V to fully charge the battery.

The Hyper Sport series requires lithium compatible chargers and testers. We do not recommend the use of lead acid chargers as many in the market are not suitable for lithium iron phosphate batteries.

**APPLICATIONS**

- Motorcycle
- Scooter
- ATV
- UTV
- Watersport

**WARRANTY**

Designed and engineered at our ISO 9001:2001 certified factories all Power Sonic batteries are subject to stringent quality control through every step of the manufacturing process ensuring both consistency and reliability. The Hyper Sport series are backed by a 2-year limited warranty.

**FURTHER INFORMATION**
