POWERMODULAR SERIES
10-2080 kVA
MODULAR ONLINE UPS

HIGHLIGHTS
• High Performance, Modular 3-Phase Power Protection
• Scalable up to 2080kVA, with 96% High Efficiency

MODULAR UPS DESIGN FOR HIGH DENSITY DATA CENTERS
• PM Series is a scalable, redundant Modular UPS system designed to cost effectively provide high level availability for high density data centers and critical applications.
• True Online Double Conversion and advanced DSP control technology.
• Modular Architecture can scale power and runtime as demand grows or as higher levels of availability required.
• Combines the modular design with the N+X parallel redundancy technology.
• The maximum capacity of a single cabinet is 520kVA. Cabinets can operate in parallel configuration to build a system of up to 2080kVA.

SCALABLE MODULAR ARCHITECTURE
Scalable up to the highest active power rating available through two dimensional modularity: Vertical and Horizontal.
• Capacity of single power module is 10-15-20-25-30-40-50kVA
• The height of single hot swappable power module is 3U
• Standard 1.4m cabinet can hold up to 5 of power modules
• Standard 2m cabinet can hold up to 13 of power modules
• The single UPS cabinet capacity can reach 520KVA and UPS cabinets can operate in parallel configuration to build a system of up to 2080kVA (see SIZE diagram on following page)

N+X PARALLEL REDUNDANCY

PowerModular series UPS adopts N+X parallel redundancy design, users can set different redundancy according to the importance of the load. While the number of redundancy modules are more than two, the availability of UPS system will achieve 99.999% and the MTBF will be more than 15,000 hours which can satisfying the reliability requirement of critical load. The UPS redundancy degree can be set through the LCD, when the load exceeds the set value, the UPS will alarm in time.
INDEPENDENT CONTROL SYSTEM

Every power module is equipped independent control system, and control itself independently according to the sharing message, and the fault module separates from the system automatically.

HIGH EFFICIENCY AND LOW TOTAL COST OF OWNERSHIP

Designed for highly economical energy consumption and is a perfect fit in your data center and server room. Offering efficiency of up to 96%, THDi of 2% and unity Input Power Factor without harmonic filters PowerModular Series delivers:

- Significant energy savings
- Lower cooling costs
- Smaller generator sizing

10kVA/15kVA/20kVA/25kVA/30kVA 3:3 phase
40kVA/50kVA 3:3 phase

- High input power factor (>0.99) and low input Total Harmonic Distortion (THDi<2%) minimizes installation costs by enabling the use of smaller generators and cabling.
- Fully-rated power kVA equals kW feature option reduces cost by eliminating the need for an oversized UPS for Power Factor Corrected (PFC) loads.
