48V 20A LIFEPO4 CHARGER

The 48V 20A High-voltage LiFePO4 Charger allows your battery to charge with the appropriate charging profile and voltage needed to perform at its best. Our charger comes standard with Anderson-style connectors creating a consistent charge. In addition, our charger is rated to IP65, protecting against low-pressure water jets and condensation while partially protected against dust.

ANDERSON-STYLE CONNECTORS

The Anderson-style connectors are heavy-duty to allow secure and quick tool-free connections. When using an Anderson-style connector, the terminals will continue to stay protected and secured from short circuits and accidental damage. Using our connectors will ultimately keep you and your

PARALLEL BUSBAR

Our busbar allows linking of multiple batteries in parallel in order to feed one load. This permits even distribution of the load across all batteries in the system. Constructed to handle high currents with a quick and easy setup and tear down. With our parallel busbar, you can organize your wires to create a clean install and provide long-lasting battery life.

BATTERY GAUGE 48V

Quickly and easily monitor the charge of your battery at any time with our 48V Battery Gauge. Numerous mounting options such as adhesive hard mounting with screws included magnet and flush mounting in your dash. Also included is a 6-foot extension cable for a built-in installation.
